

### What is VMS?

First impressions last and your reception area is usually the first interaction visitors, clients and other professionals have with your business.

Providing digital registration and fast access help build a professional, tech-savvy reputation and makes sure you have an extensive record of who enters your premises.

### Key Features

#### First Impression

Create a welcome that stands out

#### Safety & Security

Protect your people, protect your data

#### Meet Compliance

Comply with health & safety regulation & data protection regulations

#### Real-time Logs

Visitor's information are securely stored and archived so that you can access it if and whenever you need it

#### Boost Efficiency

Magnify the productivity of your reception by saving staff time to focus on other work

#### Host Notification

Receive instant notifications when your visitor arrives

### How it Works

#### Quick & Easy Check-in Process

Your visitors are presented with one touch-screen devices (such as tablets) to enter their details and who they are visiting.

#### Digital Visitors' Agreement

Present your visitor with digital agreements to read, accept and sign to keep each party safe.

#### Visitors Badge

Instantly provide visitors with a badge that includes visitors' name and other relevant information, enhancing security and guest information

#### Instant Notification

The host will instantly get a notification about who is there to visit them, and where they are waiting.

#### Visitors Analytics

Allows you to view who is on-site in real-time, report on historical visitor details and understand why guests visit or reasons for high traffic thus better plan your staff roster.
